## OBJECTIVE

---

To excel as a software developer by building impactful web applications, leveraging expertise in full-stack development, REST APIs, database management, and system design. Seeking opportunities to contribute to innovative projects while enhancing problem-solving, cloud deployment, and scalable software engineering skills.

## TECHNICAL PROJECTS

---

### Second Brain – Knowledge Management System

GitHub: <https://github.com/chinmayjgg/second-brain> — Demo: [second-brain-client-7tbj.vercel.app](https://second-brain-client-7tbj.vercel.app)

- Developed a full-stack personal knowledge app with React, Node.js, and MongoDB in a TypeScript monorepo.
- Features include JWT authentication, multiple collections (“brains”), auto URL metadata extraction, full-text search, tagging system, and public sharing of knowledge bases.

### SuperOps – AI-Powered Ticket Management System

GitHub: <https://github.com/chinmayjgg/superops>

- Built a modern full-stack ticketing system with React, Express, and MongoDB.
- Implemented AI-powered ticket categorization, priority detection, and intelligent agent assignment.
- Added JWT authentication, role-based access (admin/agent), and real-time ticket dashboards.

### DevLink – Developer Linktree + Resume API

GitHub: <https://github.com/chinmayjgg/devlink>

- Built a secure backend with Node.js, Express, and MongoDB allowing developers to manage links and resumes like Linktree.
- Implemented JWT authentication and RESTful APIs for scalable portfolio management.

### Weather App – Real-time Weather Dashboard

GitHub: <https://github.com/chinmayjgg/weather->

- Created a responsive weather app using HTML, CSS, and JavaScript with OpenWeatherMap API integration.
- Implemented real-time search, glassmorphism UI, and smart caching reducing API calls by 30%.

## KEY ACHIEVEMENTS

---

- Successfully deployed multiple full-stack applications independently.
- Built and maintained projects integrating authentication, real-time features, and AI-based automation.
- Hands-on experience with deployment platforms like Vercel and MongoDB Atlas.

## TECHNICAL SKILLS

---

- **Frontend:** React, JavaScript, TypeScript, HTML5, CSS3
- **Backend:** Node.js, Express, MongoDB
- **APIs:** REST APIs, JSON handling, Authentication systems
- **Tools:** Git, VS Code, Postman, Vercel
- **Core:** Agile Development, System Design, Cloud Deployment, Scalable Architecture

## EDUCATION

---

**Master of Computer Applications (MCA)** Current CGPA: 8.5/10

*Gita Autonomous College, Bhubaneswar*

Expected 2026

*Odisha, India*
