PROFESSIONAL SUMMARY

Full-Stack MERN Developer with hands-on internship and freelance experience building scalable web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in TypeScript, REST APIs, JWT authentication, MongoDB Atlas (Aggregation Pipelines, Atlas Search), and cloud deployment. Experienced in agile environments with a consistent record of on-time delivery and measurable impact.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES5/ES6), HTML5, CSS3 (Flexbox, Grid, Animations), Tailwind CSS, ShadCN UI, Responsive & Mobile-First Design
- **Backend:** Node.js (worker threads, cron jobs), Express.js, GraphQL, REST APIs, JWT Authentication, Mongoose, MongoDB Atlas (Aggregation Pipelines, Atlas Search, Vector Search)
- **Tools & Practices:** Git, GitHub, Postman, VS Code, Vercel, System Design, Scalable Architecture, Agile/Scrum, Code Review, Cloud Deployment

WORK EXPERIENCE

Software Engineer Intern | *Aspol Media, Nagpur*　　　　　　　　　　　　　　　　*Oct 2025 – Feb 2026*
- Contributed to migration of an internal company tool from PHP to Node.js, rewriting backend modules and REST API endpoints using Express.js and MongoDB.
- Rebuilt server-side logic and data models in Node.js, ensuring feature parity with the legacy PHP system while improving code structure and maintainability.
- Collaborated through daily stand-ups and code reviews; gained hands-on experience working on a live production codebase in a professional agile environment.

Freelance Full-Stack Developer | *Self-Employed (Upwork), Remote*　　　　　　　　　*Jan 2025 – Present*
- Built and deployed a responsive business website for a local construction client; implemented service showcase, contact forms, and mobile-first UI with basic SEO setup.
- Handled end-to-end delivery including domain setup, hosting configuration, and deployment; ensured the site was functional, secure, and easy for a non-technical client to manage.
- Provided JavaScript and Node.js bug-fixing services for small projects on Upwork, diagnosing logic errors, API issues, and async/callback problems for clients.

PROJECTS

Resumix – Resume to Portfolio Converter | *Next.js, TypeScript, Node.js, MongoDB Atlas, Vercel* | `GitHub` | `Live`
- Built a full-stack MERN portfolio builder converting **50+ resumes** into personalized websites using a custom PDF parsing pipeline with **70% accuracy**.
- Integrated WYSIWYG editor, customizable themes, and dark mode, boosting engagement by **30%**; deployed on Vercel with MongoDB Atlas backend and open-sourced on GitHub.

Second Brain – Knowledge Management System | *React, Node.js, TypeScript, MongoDB, JWT* | `GitHub` | `Live`
- Developed a full-stack personal knowledge app in a TypeScript monorepo architecture, actively used by **20+ real users** for organizing and sharing digital knowledge.
- Implemented JWT authentication, multiple collections (brains), auto URL metadata extraction, full-text search via MongoDB Atlas Search, tagging, and public sharing via unique URLs.

EDUCATION

Master of Computer Applications (MCA)　　　　　　　　　　　　　　　　　　　*May 2024 – May 2026*
Gita Autonomous College, Bhubaneswar, Odisha　　　　　　　　　　　　　　　　　　GPA: **8.25 / 10**

CERTIFICATIONS

- Databases and SQL for Data Science with Python – IBM (Coursera)
- Introduction to Mobile Development – Meta (Coursera)
